Sponsorship has long-served businesses seeking to inspire, reward and engage both existing and new customers through innovative and exciting rewards programmes. In the wake of the CV-19 pandemic we've seen an increasing emphasis on rewarding sustainably (social purpose, environmental action, inclusive/ or access opportunities). Across this panel we'll explore what impact sustainable rewarding has on customer attitudes and behaviour as well as considering the impact on brand value, perception and employees. Alongside this we'll consider how sponsorship-seekers can support this trend and repurpose assets to meet demand.
